

R.A.C.E. Carcass Weigh Grade System

User friendly Carcass Weigh Grade System

RACE Carcass Weigh Grade
System GUI

Multiple Species:

The R.A.C.E. Carcass Weigh Grade System provides carcass grading for beef, sheep, goats, pigs, deer or any user defined carcass type. The system is designed for total user configurability, there are 42 multi-function hot-keys available for the selection of sexes, grades, muscling, defects (diseases), dressing faults, destinations and comments - all of which are user configurable.

Total Solution:

The Carcass Weigh Grade system works with the R.A.C.E. Mob Entry and R.A.C.E. Management Suite (RMS) products. All grading data can be viewed and edited via the RMS, configurations are also administered from the RMS. Data is exposed using an MSDE database, or alternatively, XML or CSV data export files can be produced.

Open System Platform:

R.A.C.E. software has been designed using Microsoft development products and uses Windows XP Professional as it's standard platform. With almost 20 years experience in the meat industry, R.A.C.E. understands that different companies have different requirements, which is why we encourage them to actively work with us so we can provide the most suitable and effective software solution possible.

Complete Installation:

The complete Weigh Grade package includes a RITS (R.A.C.E. Industrial Touch Screen PC) and barcode printer. R.A.C.E. can configure our software to work with your onsite hardware (e.g. Barcode Printers, Scales...) to reduce installation costs.

Technical Specifications

Features & Advantages:

- Multiple scales input (for main and detain chains)
- Multi scales protocols for different scale types
- Up to 42 defects/dressing faults/comments for complete configurability
- Stand alone or multiple networked stations to adapt to any installation
- Manual mob entry
- Fully redundant in case of network failure
- Ear tag scanning capability
- RFID compatible for skid tracking
- Label printer selection
- Side or quarter processing
- Default grades and muscling classes

Hardware Requirements:

- PC Hardware, 300MHz or faster, 128 megabytes RAM, 20 Gigabyte hard disk
- Windows 2000 or XP
- RS232 or current loop scales
- Label printer

CALL TODAY TO DISCUSS YOUR PARTICULAR REQUIREMENTS

Carcass Weigh Grade
System in action

Although the R.A.C.E. Carcass Weigh Grade was designed to be placed on a R.A.C.E. Industrial Touch screen PC, any Touch Screen PC that meets the above requirements may be used.
