

R.A.C.E. Carton Weigh Label System

Carton Weigh Label System in action

Adaptable Carton Weigh Label System

The R.A.C.E. Carton Weigh Label (CWL) system has been designed for all carton labelling needs.

Versatile Data Capture:

It provides weight capture, product selection, label printing, order entry, carton verification and has 480 configurable hot keys on 12 pages to suit every product requirement, with each page colour coded and user labelled for easy identification.

Choice of Weighing Options:

Products can be weighed using either catch weight or set weight parameters, with user defined tolerances.

Order Entry:

For customer orders, the Order Entry section is provided for specific customer product requirements. This allows for multiple products and orders of either carton number or weight specifications, with warnings when near completion or each product line and the entire order.

Network Connectivity:

The R.A.C.E. CWL can be stand-alone for single users or networked for multiple station requirements. Remote management is also provided to edit, manipulate and report on production.

No more Phantom Cartons:

A special feature of our software is real time carton validation, whereby produced cartons are validated against the database, removing duplicate and phantom carton records.

Open System Platform:

This system was developed using Microsoft Development products allowing interfacing to customer's existing databases like Access, SQL, Navision etc.

The complete CWL system is installed on a RITS (R.A.C.E. Industrial Touch Screen PC).

Technical Specifications

Features & Advantages:

- 12 pages of 40 'hot keys per page' for product selection
- Password entry for Users and Supervisors
- Production viewing from work station
- Order viewing from work station
- Label orientation selection
- Shift selection (2 shifts)
- Multiple user selection
- Multiple date selection, page selectable
- Carton barcode validation to remove phantoms
- Ability to interface to RFID for carton tracking
- MS Access or SQL database connectivity
- Carton Deletion
- Carton Reprint
- Carton Relabel
- Part carton entry

User Defined Features:

- Product page titles and colours for ease of distinction
- Product key locations and names for product flexibility
- Order entry with multiple products per order
- User name entry and defined passwords
- Label editor for product specific labels or fixed labels formats
- Database and CSV file locations allowing remote data storage

RACE Carton Weigh Label
System GUI

Hardware Requirements:

- PC hardware, 300MHz or faster, 128 megabyte RAM, 20 Gigabyte hard disk.
- Windows 2000 or XP
- RS232 or current loop scales
- Label printer

Customer Comments:

"Far Better than our last system"
"Much easier to use"
"Very adaptable and configurable"

CALL TODAY TO DISCUSS YOUR PARTICULAR REQUIREMENTS

Although the R.A.C.E. Carcass Weigh Label was designed to be placed on a R.A.C.E. Industrial Touch screen PC, any Touch Screen PC that meets the above requirements may be used.
