

IDENTIFICATION

The DS2100N is the ideal compact laser bar code scanner with complete connectivity and communication options for close reading applications. The DS2100N is available in distinct models offering on-board PROFINET, EtherNet/IP, and Ethernet TCP/IP communication protocols. With on-board Ethernet ports and switch capability, the DS2400N can be networked into PROFINET line or ring topologies for system redundancy. With EDS-AOP setup tools, configuring the EtherNet/IP fieldbus communication is simple and easy. Through PROFINET, the DS2400N can be configured via the modular structure contained in the GSDML file. Parameters are stored in the GSDML file, providing automatic configuration for failed or replaced devices. With an innovative rotating connector block, the DS2100N minimizes its mechanical dimensions offering a flexible form factor during installation. Embedded switches, dual PROFINET parts, and a rotating connector block are a few of the unique features that define the Datalogic DS2x00N family. Additionally, innovative software features provide easy and simple scanner installation and replacement. The DS2100N is equipped with the latest generation microprocessor powering an improved code reconstruction algorithm delivering superior performance on low quality codes or damaged labels.

HIGHLIGHTS

- Embedded Ethernet connectivity
- Two PROFINET Ports
- Embedded Ethernet Switch
- Line topology
- Rotating connector block
- Compact dimensions
- Installation flexibility and optimum form factor
- ACR: Advanced Code Reconstruction
- Excellent performance on low quality and damaged labels
- Up to to a 300 mm (11.8 in.) reading distance

APPLICATIONS

- Automatic warehouses
- Factory automation
- Automatic picking systems
- Process control and packaging
- Print & apply systems

TECHNICAL DATA

| INDUSTRIAL LASER BAR CODE SCANNERS | DS2100N-12XX | DS2100N-13XX | DS2100N-14XX |
