

R.A.C.E. Industrial Touch Screen

AT LAST!

A real Industrial Computer 15" Colour Touch Screen

Rugged, Reliable:

The R.A.C.E. Industrial Touch Screen (RITS) is a complete, fully optioned, industrial touch screen PC, enclosed in 16 gauge stainless steel, with a tried and tested IP65 rating. This unit ideal for applications where dust, water, and blood are involved, providing long service, and removing the need for costly replacements of inferior devices.

No Proprietary Parts:

All internal parts used in the RITS are of highest quality, containing no custom built parts. This removes the need for specialist service personnel or off site service.

Open System Design:

Each RITS is supplied pre-installed with Windows 10 or your choice of operating system. Load your application and you're in business.

High Quality and Proven:

This product is intended for applications within harsh environments which demand performance and reliability – with no compromise of durability and robustness. Our customers are using the RITS product range where dust, wetness and temperatures can be extreme.

Easily Maintained:

Protection of the resistive touch panel is achieved using a poly-carbonate sheet, which is easily user replaceable. All other internal parts are easily serviceable with the swing out front panel. Connections to the RITS are via C16 connectors, making them rugged and water-tight.

Technical Specifications

Applications:

- Meat and Fish Processing; grading and carton labelling
- Timber production; grading, process control, and data capture
- Machine shop floor; machine and process control
- Access Control
- Mining Applications
- Mobile Machinery Control
